INSTITUTE FOR ADVANCED COMPUTATION

August 31, 1976

To Whom It May Concern:

I employed the services of Roger Grainger of Judson Enterprises for approximately three months starting in March, 1976. He was commissioned to prepare two documents for the GISS Code Development Project, a large-scale weather forecasting application for the ILLIAC IV.

These documents were entitled

USER'S GUIDE for the GISS Global Circulation Model

and SOFTWARE DOCUMENTATION for the GISS Global Circulation Model.

In both the USER'S GUIDE and the SOFTWARE DOCUMENTATION, Roger focussed clearly on their respective audiences, emphasizing technical accuracy and the requirements of the reader. I was especially pleased with Roger's commitment to deliver quality documentation and with his assertiveness in examining new technical areas. I look forward to working with him again on future ILLIAC code development projects.

Sincerely,

Dr. M. A. Gunn
Manager, ILLIAC IV Code Development
